

The Jet-Kleen™ Series

AIR PERFORMANCE FOR DE-DUSTING & DRYING WITHOUT THE DANGER OF COMPRESSED AIR!

Keep your workers SAFE and PREVENT troubles with OSHA!

The Jet-Kleen™ and Jet-Kleen Limited™ Blow-Off Systems from Specialized Safety Products provide safe, economical, and highly effective removal of residues – such as dust, fiber, water and more – from people, surfaces, or work environments.

Both the Jet-Kleen and Jet-Kleen Limited offer a safe, efficient alternative to compressed air, consuming less energy and emitting less noise. Their blower-driven

system delivers a high volume of air at a relatively low pressure– well below OSHA standards. The lower pressure means Jet-Kleen units can be safely aimed at virtually any part of the body (excluding the eyes and ears); even direct contact with unprotected skin poses no hazard. Both the original Jet-Kleen and the NEW Jet-Kleen Limited are available in either portable or wall-mounted models.

JET-KLEEN™

Safe, Personnel Blow-off & Drying System

- Standard features include variable timer control on wall-mount models, chip guard, and filter assembly
- Safer to use and more energy-efficient than high-pressure air compressors
- Blower-driven system ensures quieter operation than compressed air systems
- Lightweight portable models can be moved easily to any location
- Portable models include foot pedal for easy on-off operation
- Rugged, heavy-duty plastic body

NOW available for the budget-conscious: Safe, quiet performance in a smaller package!

JET-KLEEN™ LIMITED

- Same rugged, heavy-duty plastic body as the original Jet-Kleen
- Available as 115 V, 1 Ph, 50/60 Hz or 240 V, 1 Ph, 50/60 Hz models
- Standard features include extra long hose and filter assembly
- Blower-driven system ensures quieter and lower-cost operation than compressed air systems
- Portable models offer optional wall-mount bracket, chip guard, and quick-disconnect swivel

Unparalleled Performance and Reliability

The ORIGINAL

JET-KLEEN™

Portable Models

- Weight: 18.6 lbs. (8.4 kg)
- Dimensions:
16.6 L x 11.3 W x 13.7"H
(42.2 x 28.7 x 34.8 cm)

Wall Models

- Weight: 18.6 lbs. (8.4 kg)
- Dimensions:
16 H x 14 W x 11.9"D
(40.6 x 35.6 x 30.2 cm)

(also shown—
optional stainless steel protective
cover for secure indoor and
outdoor use)

ON OUR WEBSITE**

Standard Features

All Models

- Blower-driven system delivers high volume of air at a safe 3.0 psi (206.8 mBar)
- Flexible hose allows easy control of air nozzle
- Heavy-duty plastic body ensures rugged performance
- Chip guard acts as safety shielding, protecting the user from dangerous blow-back particles
- Heat-resistant hose retains flexibility in all workplace environments
- Quick-disconnect swivel for easy removal of nozzle
- Insulated interior ensures low noise levels – maximum 78 dB (A) (*only on standard Jet-Kleen model*)
- 115 V and 240 V, 50/60 Hz units available

Portable Models

- Foot pedal for easy on/off control
- Extra long 96" (243.8 cm) hose

Wall-Mount Models

- Holster holds nozzle when not in use
- Timer control regulates timing before Jet-Kleen shuts off automatically
- 56" (142 cm) hose
- Water resistant

Options and Accessories

- Variable speed controller included with select models
- Stainless-steel protective cover for secure indoor and outdoor use of wall-mounted units
- Timer (standard on wall-mount unit)

Jet-Kleen Helps Curtail the Use of Dangerous, High-Pressure Air

"Our employees were using high-pressured air to blow the dust off their clothing. No matter how many times we threw the air lines away or disabled the hookup point, they managed to find another drop to hook up to. This system is just what we needed to curtail the use of high-pressured air that we know can be very dangerous at times."

- Jim Parlin, Supervisor, Century Aluminum Corp.

The Jet-Kleen, shown with standard chip guard attachment.

**Others have tried to copy the Jet-Kleen™ but
no other products can beat our PROVEN quality
and consistent performance with
HUNDREDS of hours of trouble-free operation!**

The Jet-Kleen™ Series

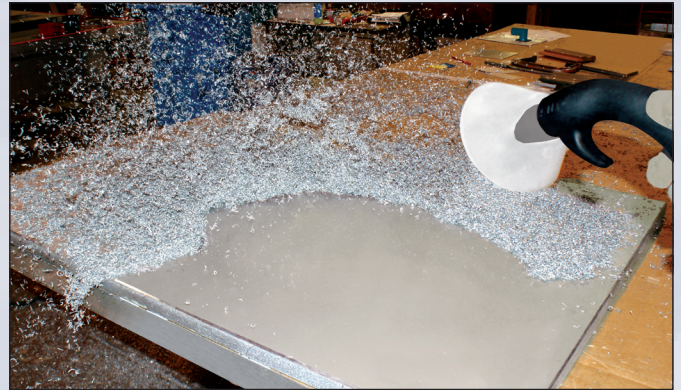

A versatile Blow-off System that crosses multiple applications and industries!

Examples of a Few Industrial Applications

- Aerospace
- Aluminum
- Automotive
- Bakeries
- Breweries/Distilleries
- Casting
- Cement (Dust)
- Chemical Plants
- CNC Shops
- Composites Manufacturing
- Construction
- Electrical Fields (Contractors)
- Electro-Static
- Environmental
- Fiberglass
- Flocking
- Flooring Manufacturing
- Forestry
- Ionization
- Industrial (Personnel Cleaning Stations)
- Minerals
- Mining
- Museums
- Optics
- Packaging
- Paper/Recycling Mills
- Pet Care
- Photonics
- Pigment
- Plastics
- Powder Coatings
- Railroads
- Semiconductor
- Shipping Areas
- Screen Printing
- Textile
- Textile Producers
- Tissue (Fibers)
- Tobacco
- Woodworking

Schools Can Now Remove Dirt and Debris Safely

Many schools have industrial classes, such as wood shop, metal shop, ceramics and clay, plastics, etc. These classes routinely use compressed air to remove dirt, dust, powder and metal shavings off the students' clothing. With Jet-Kleen, debris removal is achieved without the use of dangerous compressed air, preventing injury.

The Jet-Kleen is invaluable for cleaning production scrap and residue from all types of machinery, such as CNC stations and drill presses.

FEATURED APPLICATION:

Cleanly, Quickly, Safely Remove Moisture

The Jet-Kleen Blow-Off System is a time saver as well as a safe and efficient means of removing moisture from screen printing frames, machine parts, or components.

Until recently, screen printers or others that needed to remove water from parts used compressed air, which is expensive and can be hazardous to employees.

Compressed air contains dirt, oils and water, so it actually emits the very substances a user is trying to remove. Additionally, using compressed air through a tiny aperture is time-con-

suming compared to the Jet-Kleen's nozzle opening of more than half an inch. The time it takes to remove water from a screen, for example, is reduced to less than 2 minutes with a Jet-Kleen, compared with 10 minutes or more with compressed air.

Although safe for individual use—it can be aimed directly at bare skin—the Jet-Kleen still delivers a powerful volume of oil-free, clean and dry air that quickly and effectively removes moisture. The Jet-Kleen is ideal for companies seeking efficiency and employee safety.
