# AWT SCREEN IMAGING SERVICES

## Quality craftsmanship – Quick turnaround – Competitive pricing

From simply stretching your screens, to creating custom screen images or constructing ready-to-print screens, AWT World Trade is your one-stop source for exposing and complete screen making services. Outsource your imaging work and reduce your labor costs. It's a great way to free up floor space and accelerate the productivity of your shop.

Screens are produced to your specifications, including frame dimensions and mesh count. Your artwork can be created, or imaged to your film positive in any size you require, and made completely press-ready.

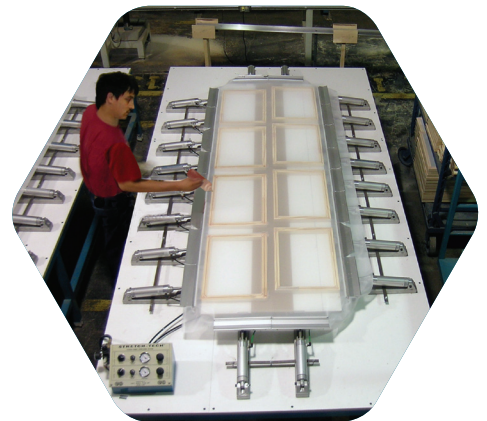

AWT screen making services are preferred by screen printers worldwide—including many corporate clients—for their outstanding accuracy, consistency, durability, and attention to detail.

Our technicians achieve precise mesh tensions across the entire print area, delivering consistent performance from frame to frame for accurate multicolor printing, and from job to job for dependability in production environments.

## ACCURATELY-TENSIONED SCREENS

### Emulsion-ready mesh and frames

Available in a wide range of fabrics and thread diameters, AWT screens will stretch uniformly to almost any tension. AWT screens are available pre-tensioned to specific tolerances using most frames, including wood, aluminum, self-tensioning, roller, conical, and extruded frames.

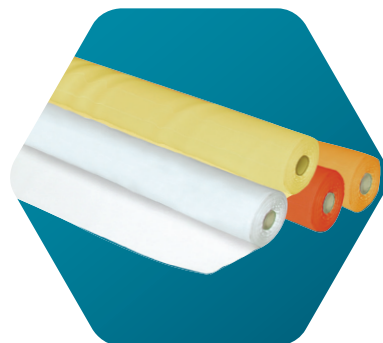

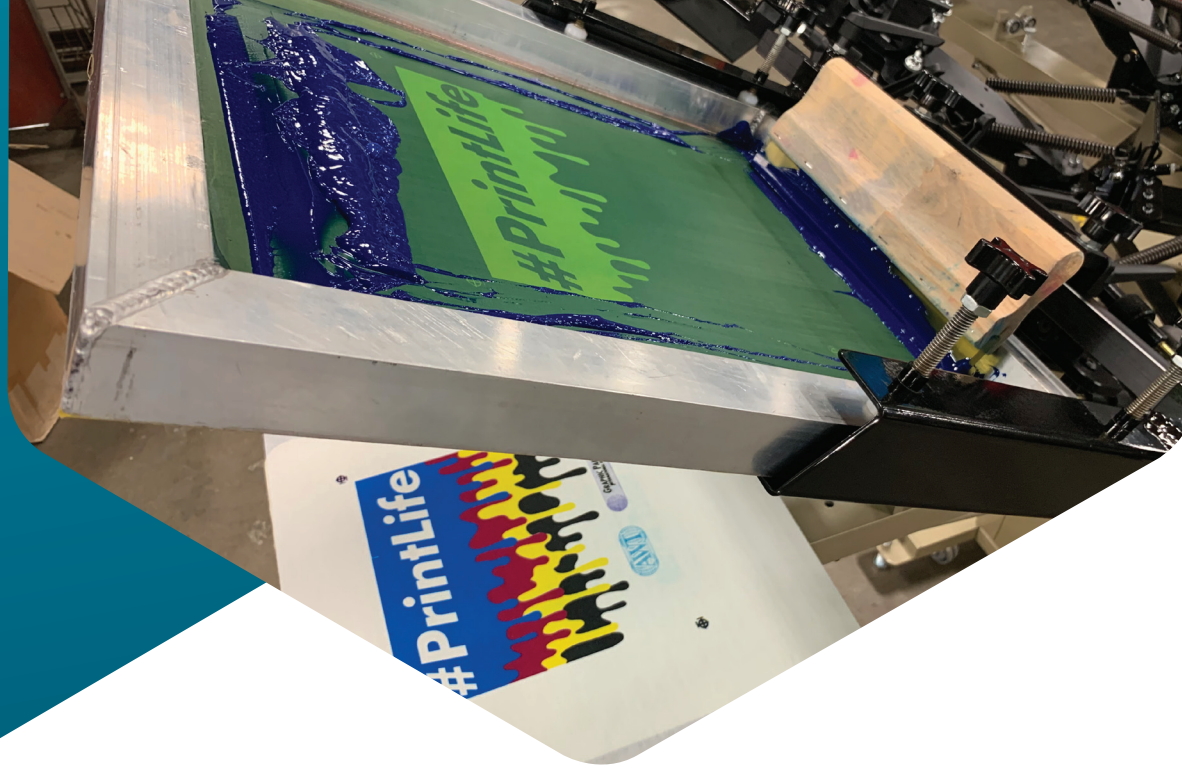

### Durable custom frames

- Made to order
- Solid, lightweight, long-lasting
- Corner gussets and pre-bow options
- Available in a range of channel sizes and wall thicknesses
- Wide variety of frame types: aluminum, wood, Chase-style, self-tensioning, roller, specialty, oversized

### Stable, high-quality fabrics

- Optimum stability for consistent tension levels
- Fine line or halftone exposure
- Extensive variety of mesh counts, thread diameters and weaves available

## CHOOSE FROM:

### Press-ready imaged screens

AWT screens can be produced to your specifications, imaged with your film positive, and made press-ready. AWT screens feature consistent mesh tension and can be imaged in any size you require.

### Re-stretch your existing screens

AWT will take your existing screens and strip, clean, regrind, and re-stretch them to your specific requirements.

OR

## SPECIFICATIONS

CAT. NO	DESCRIPTION
SCI-AP	Any editing that is required of the customer's image, including resizing, adding/removing elements, improving quality, etc. Also includes creating an image.
SCI-FP	Screen Imaging Film Positive
SCI-IM	Screen Imaging
