# TORNADO™

## Ink Mixer and Color Blender

### ADVANTAGES

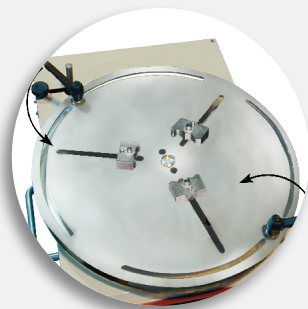

- Saves time by mixing and blending in your original container
- Accepts US and international container sizes from one quart to five gallons (1-25 liters)
- Adjustable blade height prevents blade from scraping bottom of container
- Reversible mixing direction
- Variable speed control
- Tool-free locking levers for quick job changeovers
- Easily change mixing blades
- Self-centering locking feature

The popular Tornado™ Ink Mixer and Color Blender from AWT World Trade, Inc., is ideal for mixing matched colors, adding pigments such as glitter or fluorescent color to bases, and for ensuring proper blending of reducers and other modifiers. The unique design of the Tornado saves time by mixing right in the original container.

Adjustable self-centering locking clamps on the turntable accommodate both metal cans and plastic containers.

Special blade configuration provides gentle but thorough mixing without splash-up or air bubbles. Blades simply slide on and off for easy changeover between container sizes. Up-front, solid-state control panel features a variable speed control and reversible turntable direction.

Popular options and accessories include a heavy-duty stand with or without casters; storage shelf, automatic shutoff timer, safety screen, double grippers for use with some tapered buckets, and a range of optional mixing blades.

*Adjustable self-centering locking clamps*

A Company with  
proven experience.
